SUMMARY :

I am a dedicated Frontend Developer specializing in **Next.js**, with hands-on experience in **JavaScript**, **TypeScript**, and the **React** ecosystem. I have a strong command of modern UI frameworks including Tailwind CSS and Shadcn and … , enabling me to build responsive, user-centric web applications. I thrive in collaborative, team-based environments and am passionate about continuous learning and contributing to innovative projects that enhance both my skills and the success of the team.

SKILLS :

React , Next.js :
Creating websites with React Next.js with the principles of safe and clean coding

Typescript , Zod :
I use these in the validation and my codes type

Redux ToolKit , Context API , zustand , Axios , Tanstack
By these I handle my states & API calls in projects

Tailwind / Bootstrap / Material UI / Shadcn / Hero UI
Using css frameworks in every situations that they are needed

MongoDB / Prisma :
Manage Data with Mongo and Prisma

Javascript DSA
Using this improve the performance

EXPERIENCE :

elan.ir (Frontend developer in the elan)

Next.js , *React* , Typescript , Tailwind , Redux , Tanstack , Shadcn , Hero UI- Nov 2024 - Now

- As frontend developers, we are building a real estate website that includes separate panels for Admin, User, and Agency. The project is developed using Next.js. For the User panel, we are using ShadCN UI, while the Admin and Agency panels utilize Hero UI for their interfaces. In terms of state management, we are leveraging both TanStack Query and Redux Toolkit to handle data fetching and global state efficiently.

Hantana.org (Frontend developer in the hantana)

React , Typescript , Tailwind , DSA , Redux - May 2024 - Aug 2024

- In this site , the admin panel and user dashboard were designed using React , and then all authentication pages were refactored . We also worked to improve the site's performance using React Hooks and javascript DSA

Rental-Pulse

Next.js , React , Typescript , ShadcnUI MongoDb , Prisma - Feb 2025

- in this site which is a FullStack website and is in the real-state domain . I designed this site using React and Next.js . I used Typescript to comply with the type safety issue , and I used MongoDB , Prisma to manage my data and for authentication I used Next-Auth

Meals-app

Next.js , React.js , Tailwind , Typescript - Jan 2025

- This website designed using Next.js is a website for posting and reviewing recipes for various foods.

Ecommerce

Next.js , React.js , Tailwind , Typescript , Json server , Redux - Jan 2025

- In this website that is a ecommerce , i use redux and axios for state management and api fetch and also Json server for my data . and for authorization I use JWT token .

EDUCATION :

Bachelor's Degree in Computer engineering(IT)- August 2024- January 2020

Tabriz University

Languages :

My native languages is persian and I can read , write and speak in English too.
